CAPABILITIES STATEMENT

Florida IT Online

Senior-Level Microsoft Azure Architecture and Cloud Operations Support

01 Company Overview

Florida IT Online LLC is a veteran-owned small business delivering senior-level Microsoft Azure cloud architecture, infrastructure engineering, automation, and IT operations support to clients in Florida and remotely nationwide. Highly certified key personnel bring more than 15 years of professional IT experience spanning enterprise cloud design, networking, database administration, cybersecurity controls, and analytics platforms. The firm operates as a direct technical delivery partner and as a qualified subcontracting resource for larger federal prime contractors.

02 Core Competencies

- **Cloud Architecture and Migration Review:** Azure environment design, including virtual networks, VPN connectivity, and Entra ID identity integration.
- **Cloud Automation and Monitoring:** Automated deployment, monitoring, alerting, and service-ticket generation that replace manual IT administration.
- **Disaster Recovery and Backup Restoration:** Legacy and production database recovery and cold-backup restoration.
- **IT Consulting and Systems Integration:** Advisory support for cloud modernization, systems integration, and IT operations planning.
- **Secure Application Hosting and Deployment:** Web application configuration, DNS, hosting, and security review for production launch.
- **Data Platform and Analytics Support:** Reporting and analytics enablement using Microsoft Power BI and Microsoft Fabric.

03 Differentiators

- **Full-Lifecycle Cloud Expertise:** Senior-level architecture and strategy combined with hands-on implementation and operational support.
- **15+ Years of Professional IT Experience:** Hands-on delivery across Azure, networking, databases, automation, and analytics.
- **Rapid Delivery Under Urgent Requirements:** Delivered an urgent Azure web application and restored a legacy Oracle production database, each in approximately three hours.
- **Direct Senior-Level Access:** Clients work directly with the owner and senior technical delivery lead for architecture, implementation, and operational support.

04 Relevant Commercial and Key Personnel Experience

Work performed by the owner and key personnel, not company contract performance.

Azure Client VPN Implementation
Role: Implementation · **Client:** Head Start Programs
Scope and Outcome: Implemented Azure client VPN solutions for secure remote connectivity.

Cloud Security and Compliance Assessments
Role: Assessment · **Client:** Multiple Clients
Scope and Outcome: Assessed cloud and automation architectures against security and compliance requirements, including customer-managed encryption keys.

Enterprise Azure Infrastructure and Automation Modernization
Role: Technical Leadership and Engineering · **Client:** Professional Services Client
Scope and Outcome: Led Azure networking, identity, automation, and database services; implemented automated agent deployment, monitoring, alerting, and service-ticket generation.

Legacy Oracle Database Migration
Role: Hands-On Migration · **Client:** Aerospace
Scope and Outcome: Performed a hands-on legacy Oracle database migration for an aerospace customer.

Legacy Oracle Database Recovery
Role: Recovery and Restoration · **Client:** Commercial Business
Scope and Outcome: Restored a legacy Oracle 10g production database from cold backup in approximately three hours, avoiding a full rebuild.

Regulated Data Automation Assessment
Role: Advisory Assessment · **Client:** Manufacturing
Scope and Outcome: Assessed an attended Power Automate Desktop approach that could keep International Traffic in Arms Regulations data within the approved environment. Advisory only; not implemented.
